My dear Brothers and Sisters in Christ.  
My name is Father Hugh Chikawe. I am here to represent the Religious Congregation of the Daughters of Mary from Tanzania.

On behalf of the Sisters, I would like to extend my sincere gratitude to each one of you, for giving me this opportunity to share with you the issues concerning the Daughters of Mary and their ministry in Tanzania.

Thank you for your prayers and considering supporting their Mission in Tanzania.

The Congregation of the Daughters of Mary was founded 87 years ago by the White Fathers and White Sisters, known as the Missionaries of Africa. They work in 8 different Dioceses in Tanzania. The Sisters engage in various activities such as health care, education, pastoral ministry, social work, and women and children development. Education and healthcare services are particularly directed to rural areas where the Sisters serve poor nomadic people and orphans.

Health care is one of their major areas of concern. The Sisters run dispensaries, health centers and clinics in the rural areas of Tanzania where there is poverty and health care is poorly accessed.

Many patients walk a distance between 9-10 miles to reach the clinics. Some patients lose their lives due to the lack of transportation. Once a week, the sisters must do a movable clinic to reach the remote rural places where the transportation is a motorcycle.

The people who suffer the most are children and expectant mothers who die on the way to the clinic because of the lack of transportation.

Patient beds at Kipalapala Clinic – Tabora

Water Supply for Kipalapala Clinic – Tabora

Kipalapala Clinic – Tabora

Kipalapala Clinic – Tabora

Many times, women are forced to share a bed after delivering their babies because of the shortage of beds. To meet the needs of mother and child who need our care, love and support, the Sisters need to purchase hospital delivery beds and delivery kits that can be used in the rural areas.

Ussongo Clinic Sterilization

Ussongo Clinic – Singida – Medicine Cabinet

Ussongo Clinic – Singida – Medical Lab

My dear brothers and sisters in Christ, healthcare services, without proper equipment is almost impossible. The Sisters need to purchase 20 hospital delivery beds that cost \$200 per bed, and we need 50 delivery kits that cost \$50 per kit. Also, the Sisters need 20 Neonatal infant incubators that cost \$2,000 per incubator.

Your financial support is highly appreciated to enable the Sisters to effectively meet the needs of Mother and Child. Thank you for your prayers so that the work the Sisters do will continue to show the great love of God to those we serve. And thank you for supporting their missions in Tanzania. God bless you all.
